

Server-based Video Training

A convenient, affordable solution for
company-wide lubrication best-practice training

Now you can put Noria's lubrication and oil analysis training videos on your corporate servers or intranet for unlimited viewing at any or all of your locations.

Students Can

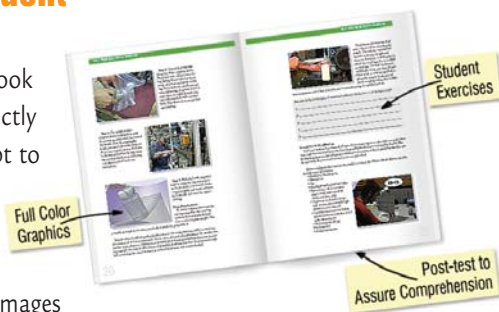

- Learn best practices at their own pace
- View or print student workbooks
- Take interactive quizzes for each video
- View any part of any video at any time

Features at a Glance

- Standardizes training company-wide
- Works easily with Learning Management Systems (SCORM compliant)
- Simple deployment on FTP-type intranets – just drag and drop
- Local or enterprise-wide installation

Printable Student Workbooks

Each student workbook was developed directly from the video script to help reinforce the information and includes student exercises, full-color images and post-tests to assure comprehension. Student workbooks are in PDF format.

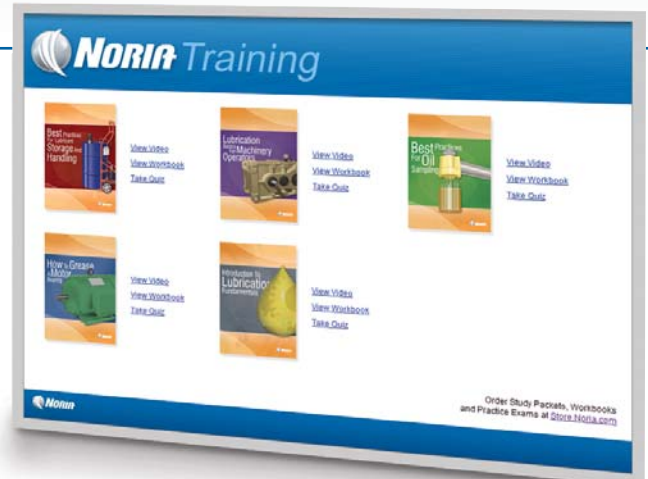

Videos Included

- **How to Grease a Motor Bearing** provides plant personnel with an overview of the best practices for lubricating electric motor bearings. Anyone responsible for the maintenance, operation and reliability of electric motors will benefit. Use it to train operators, lubrication technicians, mechanics, electricians and maintenance personnel for years to come.
- **Introduction to Lubrication Fundamentals** provides a solid foundation on the basics of industrial lubricants and tribology. Oil and grease properties, additives and their functions, the difference between synthetics and mineral oils, lubricant oxidation, and many other important topics are discussed.
- **Best Practices for Oil Sampling** shows you how to design and implement a world-class oil sampling program that will deliver better results and help you focus on improving equipment reliability.
- **Best Practices for Lubricant Storage and Handling** provides procedures you can implement right away for managing lubricants – from delivery to dispensing to filling the machine. You'll learn the very best practices for new oil storage and handling, and use this video to train lubrication and maintenance personnel, operators, mechanics, new hires and others.
- **Lubrication Basics for Machinery Operators** provides lubrication basic training, including recognizing the early signs of lubrication-related problems, grease gun basics and safety, checking oil levels, cleaning and inspecting machinery, oil leak inspections, and more.

Use your own Learning Management System or Use the Included Dashboard for Fast, Easy Access

Deploying at your facility or enterprise-wide couldn't be easier. Whether you already have a Learning Management System (LMS) or just want to include the training on your intranet, it's quick and easy to install and begin training right away.

Frequently Asked Questions

How are the courses delivered after purchasing?

The courses can be delivered on CD-ROM, DVD or you may download them in ZIP format.

What does SCORM Compliant mean?

SCORM (Sharable Content Object Reference Model) is a collection of standards and specifications for web-based e-learning. Many organizations use SCORM-certified Learning Management Systems (LMS) for managing their computer-based employee training. Noria's video-based training courses are SCORM compliant, meaning they will integrate seamlessly with any SCORM-certified LMS.

What version of SCORM are the courses?

The courses are available in SCORM 2004, SCORM 1.2. or BlackBoard 9.x.

Are the courses available in AICC format?

Yes. The courses can be delivered in the Aviation Industry Computer-Based Training Committee (AICC) format.

Why Video-based Training?

- **Standardization:** Everyone gets the same message, every time.
- **Affordable:** No travel or hotel costs. One-time purchase.
- **Flexible:** Train groups or individuals at their own pace.
- **Convenient:** Immediately train new hires or retrain employees at any time.
- **International:** Available in English and Spanish language versions.
